SUMMARY

Computer Science graduate with 2+ years of professional experience in building scalable web applications and AI solutions. Smart worker and a quick learner with a will-do attitude and proven expertise in optimizing backend architecture, crafting creative frontend experiences, and implementing efficient DevOps practices.

EDUCATION

Master of Science: Computer Science, University at Buffalo, The State University of New York, Dec '24

WORK EXPERIENCE

Software Engineer (Co-op), Kaleida Health, Buffalo, NY:

Aug 2024 – Dec 2024

- Architected healthcare platform using AWS services achieving 99.9% uptime, implementing microservices with **Spring Boot** and **Docker** on EKS for 10K+ daily transactions
- Ensured **HIPAA** compliance for data protection, implemented **OAuth/JWT** for secure authentication
- Developed **React.js** frontend with **Redux** and **GraphQL**, reducing page load times by 40% through **AWS Amplify** and **CloudFront**
- Built real-time patient-doctor portal with multi-language support using **WebSocket API** and **Redis**, serving 200+ daily users

Software Development Engineer, Client: MetLife; Cognizant, India:

Jul 2021 – May 2023

- Engineered employee and employer portals for MetLife using **Spring Boot**, **React.js**, and **RESTful APIs**, enabling efficient claim submission, tracking and processing with optimized performance
- Orchestrated CI/CD workflows using **Bamboo**, **Bitbucket**, **UCDeploy**, achieving 35% faster deployments with **95% code coverage**
- Implemented scalable microservices architecture using Spring Boot and **MySQL** to handle 10,000+ daily insurance claims, improving system reliability by 40%
- Maintained 98% deployment success rates through **JIRA** workflows, ensuring consistent delivery of critical insurance processing features

Software Development Engineer Intern, Cognizant, India:

Mar 2021 – Jul 2021

- Developed and maintained scalable web apps using **Java**, **SQL**, **Angular**, **Spring Boot**, and **AWS**.
- Built distributed and scalable applications with a focus on reliability and performance using AWS.
- Participated in daily stand-ups, code reviews, and sprint planning, ensuring alignment with team goals and timely delivery of features

Application Development Engineer Intern, COSUPS, India:

Mar 2020 – Jun 2020

- Led development of real-time **Android** application using **Java** and **Firebase**, implementing push notifications and real-time data syncing for event management features
- **Mentored 5-member intern team** while collaborating with stakeholders, delivering efficient solution with 90% user satisfaction rate

PROJECTS

Real time Twitter Sentiment Analysis using NLP

- Developed sentiment analysis app using **React**, **FastAPI**, integrating Twitter API for real-time tweet extraction and analysis
- Deployed using **AWS EC2**, **RDS**, **S3**, and **CloudFront** with **GRU** algorithms for classification

Mail Order Pharmacy System

- Developed full-stack pharmacy system using **Angular**, **Spring Boot**, and **MySQL** with secure JWT authentication, reducing order fulfillment time by 25% through automated inventory management

SKILLS & TOOLS

Languages: Python, Java, Javascript, Typescript, SQL, C++, HTML, CSS

Frameworks: React, Angular, NodeJS, VueJS, GraphQL, Spring Boot, FastAPI, Bootstrap, Tailwind

Data Management: PostgreSQL, MySQL, MongoDB, Redis, Kafka, RabbitMQ, Redux

Cloud & DevOps: EC2, ECS, S3, RDS, Cloudwatch, Lambda, Cognito, Codebuild, SNS, SQS, VPC

Tools: Git, GitHub, JIRA, SonarQube, VMware, VS Code, Postman, Jenkins, Docker, Kubernetes
